

PHOTOGRAPHY AND DIGITAL IMAGING CERTIFICATE

This certificate provides fundamental vocational training for anyone who needs to create or utilize effective, compelling photographic images for visual communication. From practical application to conceptual execution, photography has implications across all academic disciplines from the arts to the sciences. This certificate is designed to develop the student's technical proficiency and creative skill with lens-based media that they can then leverage in whatever career path they might pursue. Students will gain a thorough understanding of camera operation, post-production image editing and retouching, and critical aspects relating to the aesthetics of photography. This certificate is relevant for practically any major discipline across campus. Both fine art and documentary pathways are available.
