

WEB DESIGN CERTIFICATE

The Web Design Certificate allows students to acquire in-demand skills in web design and development. After completing the core group of three courses, which offer foundational knowledge in general creative coding, front-end development, and asset creation, students may choose a fourth course to deepen their knowledge in one of these areas. Students who complete the Web Design Certificate will have knowledge of how the web works, how to develop web sites, and web design approaches.

Post-secondary Certificate - Web Design Summary
