

# GEOGRAPHY M.S.

## Master of Science - Geography

**Degree Specific Credits:** 30 credits are required for the thesis and professional paper tracks; 36 credits are required for the non-thesis (portfolio) track.

**Required Cumulative GPA:** 3.0

For the M.S. in Geography, students may select among a general option with no concentration or concentrations in in Cartography & GIS or Community and Environmental Planning.

- The M.S. degree in Geography (with no option) offers the most flexibility and is appropriate for students who are focused on human or physical geography as well as those who have interests in human-environment interactions, climate change, land-use and environmental planning, community resilience, cartography, GIS, and geospatial analysis. In the General Geography M.S., students may tailor their program to their individual interests once they complete the core requirements.
- Choices in the core and elective credits will be selected in consultation with the graduate committee to support the research program and student’s professional goals. Coursework must be approved by the committee no later than the second semester in residence, but earlier if possible. Per Graduate School policy, at least 20 of the total credits must be taken within the major discipline; at least 20 of the total credits must be in coursework and at least half of the coursework credits (minimum 10 credits) must be at the 500 level or above; courses below the 400 level do not count towards the M.S. course requirements; and up to 10 of the 30 credits may be taken as thesis (GPHY 599).
- We just modified this description to make it more precise and relevant to students.

### Degree Tracks

For the M.S. in Geography, students are required to complete one of the following tracks:

- **Thesis track:** Successfully complete and defend a thesis or one or more papers (i.e., articles) of publishable quality before an examining committee.
- **Professional Paper track:** Successfully complete and defend a professional paper or one or more papers (i.e., articles) of publishable quality before an examining committee. The difference between a thesis and a professional paper is that while the thesis is directed toward advances in the discipline, the professional paper may be directed toward advances in the profession. A professional paper may also consist of one or more papers of publishable quality intended for publication in a peer-reviewed journal.
- **Non-thesis (Portfolio) track:** Requires the successful completion of a portfolio and written and oral comprehensive examinations.
- There is no minimum number of thesis credits that must be taken for any of the tracks.

### Courses

Code	Title	Hours
<b>Graduate Research Seminar - Complete one of the following courses, 1 credit per semester:</b>		<b>2</b>
BIOS 594	Seminar	

FORS 594	Graduate Seminar (1 cr. per semester)	
NRSM 594	Seminar	
WILD 594	Graduate Seminar in Wildlife Biology	
<b>Graduate Research Design - Complete one of the following courses:</b>		<b>3</b>
GPHY 504 & GPHY 505	Research Design in the Geographical Sciences I and Research Design in Geographical Sciences II	
NRSM 500	Conservation and Social Science Methods	
GEO 508	Fundamentals of Academic Research	
WILD 540 & WILD 541	Research Design and Research Design Lab	
<b>Graduate Methods Course - Complete one of the following courses:</b>		<b>3</b>
Quantitative methods		
ENSC 474	Environmental Analytics	
FORS 538	Ecological Statistics	
SOCI 563	Social Data Analysis	
STAT 451	Statistical Methods I or STAT 452 Statistical Methods II	
Qualitative methods		
SOCI 561	Qualitative Methods	
Historical or survey methods		
Advanced GIS or computer methods		
<b>3 Additional Credits of Graduate Seminar</b>		<b>3</b>
GPHY 525	Advanced Physical Geography	
GPHY 560	Seminar in Planning	
GPHY 580	Seminar GIS & Cartography	
Electives/Thesis Credits		19-25
Courses to be chosen with your faculty advisor.		
<b>Total Hours</b>		<b>30-36</b>
