GEOGRAPHY (GPHY)

GPHY 111N - Intro to Physical Geography: Climate, Landforms, and Vegetation. 3 Credits.
Offered spring. Introduction to earth system science, the study of the earth's climate, surface processes, and ecosystems, and their distributions, functions, and interactions. Gen Ed Natural Science Course (N).
Gen Ed Attributes: Natural Science

GPHY 112N - Intro to Physical Geography Laboratory: Climate, Landforms, and Vegetation Lab. 1 Credit.
Offered spring. Prereq. or coreq., GPHY 111N. Introduction to techniques and methods needed to understand and analyze data, graphs, maps, and images of the earth's climate, surface processes, and ecosystems, and their interactions. Prerequisites for GPHY 385. Gen Ed Natural Science Lab Course (N).
Gen Ed Attributes: Natural Science

GPHY 121S - Human Geography. 3 Credits.
Offered autumn and spring. Introduction to Human Geography focuses upon the linkages between geography and society including analysis of regions, ethnic groups, urban landscapes, migration and population change, geopolitics, economics, and cultural differences.
Gen Ed Attributes: Social Sciences, Cultural & International Diversity

GPHY 141S - Geography of World Regions. 3 Credits.
Offered autumn and/or spring. An overall view of how the lands and peoples of the world are organized into coherent geographical regions, how landscapes differ from region to region, and how the people differ in terms of their traits, beliefs, ways of life, and economic livelihood.
Gen Ed Attributes: Social Sciences, Cultural & International Diversity

GPHY 144 - Glacier National Park in Winter. 3 Credits.
Consent of Instructor. A field-based course offered during winter session in the winter splendor of the North Fork of the Flathead River and Glacier National Park. Topics addressed include physical geography, geology, winter ecology, national park management, environmental history, and the changing economy of the region.
Gen Ed Attributes: Social Sciences, Cultural & International Diversity

GPHY 241 - Montana. 3 Credits.
Offered autumn. The physical, cultural, economic, political, and historical geography of the state including Montana's mountains and the prairies.

GPHY 243 - Africa. 3 Credits.
Offered intermittently. A survey of the biophysical and cultural geography of Sub-Saharan Africa. Emphasis is on the region's cultural-historical development and current ecological, demographic, and economic patterns.

GPHY 245 - The Middle East. 3 Credits.
Offered intermittently. A survey of the biophysical and cultural geography of Southwest Asia and North Africa. Emphasis on environmental change; prehistory; patterns of cultural and historical change; issues of socio-economic, religious, and political diversity; and the broader political significance of the region.

GPHY 284 - Intro to GIS and Cartography. 3 Credits.
Offered every term. This course is designed as a practical introduction to the use of Geographic Information Systems (GIS) for storing, retrieving, analyzing and displaying spatial data. It will also cover the history of cartography and the conventions of the modern map-making process. Students need to register for a required lab section. Credit cannot be earned for both FORS 250 and GPHY 284.

GPHY 291 - Special Topics. 1-6 Credits.
(R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

GPHY 295 - Mountain Field Studies. 1 Credit.
Offered autumn and spring as a series of one-credit courses, maximum of three-credits per semester. Field studies of Montana's Rocky Mountain Front, Crown of the Continent, or Yellowstone. Students prepare to conduct field work, spend time in the field observing wildlife, physical landscapes and cultural aspects of these landscapes, and follow up their observations in written reports.

GPHY 311N - Biogeography. 3 Credits.
Offered intermittently. Changing patterns of plant and animal distributions in space and time. Combination of historical and ecological approaches to biological species and communities. Study of external causes of plant and animal distributions, especially climatic change and human impacts.
Gen Ed Attributes: Natural Science

GPHY 314 - Global Mountain Environments. 3 Credits.
Offered autumn odd-numbered years. The study of mountain environments and their physical processes around the globe: Andes, Appalachians, East African Mountains, European Alps, Hindukush-Himalaya-Karakoram, Pamir, Rocky Mountains, Southern Alps of New Zealand, Tien Shan, and others. Topics include mountain building, alpine glaciers, mountain geomorphology and climatology, mountain watersheds, mountain biogeography, and mountain hazards such as earthquakes and mass movements.

GPHY 317 - Geomorphology. 3 Credits.
Offered autumn even-numbered years. Prereq., GPHY 111N or GEO 101N. Important landforms and landscapes, their biophysical processes, and their formative elements.

GPHY 323S - Economic Geography of Rural Areas. 3 Credits.
Offered spring odd-numbered years. Study of the location of economic activities, including agriculture, industry, and services. Focus on the changing nature of rural areas.
Gen Ed Attributes: Social Sciences

GPHY 335 - Water and Sustainability. 3 Credits.
Offered autumn. Prereq., WRIT 101 or equivalent, and one intermediate writing course or consent of instructor. Geographical perspective on water resource issues and challenges facing the public, resource managers, and water users in the western United States. Examines concepts, terms, and regulatory environment which provide the foundation for sustainable water management and policy.
Gen Ed Attributes: Advanced Writing

GPHY 338 - Mountains and Society. 3 Credits.
Offered spring. Physical and cultural aspects of the mountains of North and South America, Europe, Africa, and Asia. Emphasis on combining the physical landscape with an overview of the indigenous people who inhabit the worlds' heights.

GPHY 342 - North America. 3 Credits.
Offered intermittently. Physiographic regions of North America; highlights of historical geography blended with physical and cultural aspects of the continent. Lesser known places are explored.
PHYS 444 - Crown of the Continent. 3 Credits.
Offered autumn. The study of the geographical setting of the Crown of the Continent of North America, including the richness of physical geography, history, culture, and models of conservation. Examines ongoing research initiatives, impacts of climate change, regional transformations, and the relationship between people and this mountainous environment.

PHYS 447 - Regional Geography (Multiple Regions). 3 Credits.
(R-9) Offered intermittently. Selected regions will be listed as appropriate in each Class Schedule.

PHYS 448 - Field Studies in Geography. 3 Credits.
(R-12) Offered autumn and spring. Through extended backcountry travel, experiential examination of regional landforms, climate, hydrology, soils, and patterns of vegetation and wildlife. Local landscapes, natural-resource endowment, and societies with particular emphasis on human-environmental interaction. Geographical skills and techniques, including map reading and navigational skills. Offered by the Wild Rockies Field Institute as part of a semester-long, 12-credit field experience with corequisite courses in allied fields.

PHYS 449 - Preceptorship in Geography. 1-3 Credits.
(R-6) Offered autumn and spring. Consent of instructor. Assisting a faculty member by tutoring, conducting review sessions, helping students with research projects, and carrying out other class-related responsibilities. Open to juniors and seniors who apply to instructor for consent.

PHYS 455 - Field Techniques. 3 Credits.
Offered autumn and intermittently in spring. Prereq., PHYS 112N or Consent of Instructor. Field techniques used by geographers and planners in making field observations and in collecting data.

PHYS 456 - Special Topics. 1-12 Credits.
(R-12) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

PHYS 459 - Independent Study. 1-9 Credits.
(R-9) Offered every term. Consent of Instructor. Independent study in any subfield of geography.

PHYS 460 - Field Studies. 1-9 Credits.
(R-9) Offered fall and/or spring. Field experience in the region. Includes geographically relevant field courses offered as part of Swan Valley Connections’ Landscape and Livelihood Field Semester, focusing on natural and human communities and on conservation solutions of the Southwest Crown of the Continent Region: Sustainability and Agriculture (3 cr), and Biogeography of Northwest Montana (4 cr).

PHYS 463 - Geography Capstone. 1 Credit.
Offered autumn. Prereq., Senior standing. Exploration of current research, projects, and programs of geographers and scientists/practitioners in allied disciplines and fields, and preparation of a professional portfolio. Student preparation for post-graduate professional and academic careers is emphasized. Level: Undergraduate

PHYS 464 - Sustainable Cities. 3 Credits.
Offered spring even-numbered years. Prereq., upper-division or graduate standing. A discussion of sustainability efforts in cities around the world. Topics include, for example, urban sprawl and smart growth, alternative energy, public transportation, integrated waste management, integrated water management, green architecture, and urban agriculture. Level: Undergraduate-Graduate

PHYS 466 - Community & Regional Analysis. 3 Credits.
Offered most springs. Prereq., WRIT 101 or equivalent, and one intermediate writing course. Examines human-environment relations and interactions. Topics include: human geographic perspectives on landscape, cultural ecology, political ecology, community resilience in relation to complex adaptive systems, and planning applications. Level: Undergraduate-Graduate

Gen Ed Attributes: Advanced Writing

PHYS 469 - Planning & Analysis Laboratory. 1 Credit.
Offered autumn. Coreq., PHYS 468. Laboratory to accompany PHYS 468. Level: Undergraduate-Graduate
GPHY 474 - UAV Remote Sensing for Field Ecology. 3 Credits.
Offered summer only at the Flathead Lake Biological Station. Prereq., FORS 250 or GPHY 284. This course will introduce students to field-based methods of close-range remote sensing in freshwater ecosystems. Students will gain knowledge of basic spatial analysis through GIS and remote sensing techniques. Students will learn basic applications of UAVs and Acoustic Doppler Profilers, two remote sensing instruments of fast-growing interest in ecological research and application. Students will learn about essentials to operate UAVs and ADPs, initial post-processing of data products and integrating these data into ecological research and application. Level: Undergraduate-Graduate

GPHY 481 - Advanced Cartographic Design. 3 Credits.
Offered autumn. Prereq., GPHY 284 or FORS 250 or Consent of Instructor. The course concentrates on the presentation of spatial data and the construction of cartographic products that have clear communication and excellent aesthetic design. The class meets the University’s service learning course objectives through a semester long project where students consult with a client, design and construct a map, and deliver a final product. Level: Undergraduate-Graduate

GPHY 482 - Spatial Analysis & GIS. 3 Credits.
 Offered intermittently. Prereq., GPHY 284 or FORS 250 or consent of instructor. Coreq., GPHY 489. Quantitative analysis of spatial data, including techniques for pattern analysis, classification, and interpolation within a GIS environment. Level: Undergraduate-Graduate

GPHY 485 - Internet GIS. 3 Credits.
 Offered intermittently. Prereq., GPHY 284 or FORS 250 or Consent of Instructor. Principles and techniques for distributing GIS and mapping applications through the Internet. Students need to register for a required linked lab section. Level: Undergraduate-Graduate

GPHY 486 - Transport, Planning & GIS. 2,3 Credits.
 Offered intermittently during wintersession (2 credits) or spring semester (3 credits.) Coreq., GPHY 489. A project-oriented course focusing on patterns and trends in urban passenger transportation, principles of transport planning, and modeling in GIS-T. To succeed in this course students should have comfort with basic algebra and statistics. Level: Undergraduate-Graduate

GPHY 487 - Remote Sensing/Raster GIS. 3 Credits.
 Offered autumn. Prereq. or coreq., GPHY 284 or FORS 250 or Consent of Instructor. Coreq., GPHY 489. Basic principles of remote sensing and analyzing images within a raster GIS. Review current data sources. Level: Undergraduate-Graduate

GPHY 488 - Applications of GIS. 3 Credits.
 Offered spring. Prereq., GPHY 284 or GPHY 381 or FORS 250 or Consent of Instructor. Application of GIS for managing natural and cultural resources. Covers choropleth maps, dot maps, proportional figure maps, isarithmic maps, and others. Includes computer mapping and GIS exercises. Students need to register for a required linked lab section. Level: Undergraduate-Graduate

GPHY 489 - Cartography/GIS Laboratory. 1 Credit.
 (R-4) Offered autumn and spring. Prereq., or coreq., GPHY 482, 486 or 487. Lab to accompany cartography and GIS courses. Level: Undergraduate-Graduate

GPHY 491 - Special Topics. 9 Credits.
 (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Level: Undergraduate-Graduate

GPHY 492 - Independent Study. 1-9 Credits.
 (R-9) Offered every term. Consent of instructor. Independent study in any subfield of geography. Level: Undergraduate-Graduate

GPHY 497 - Workshop in Teaching Geography. 2-3 Credits.
 Offered intermittently. Concepts and techniques in geography, with emphasis on their use in teaching geography in Montana schools. Students are required to prepare and present a teaching unit project. Designed for pre-service or in-service teachers. Level: Undergraduate-Graduate

GPHY 498 - Internship. 1-6 Credits.
 Offered every term. Consent of instructor. Extended classroom experience which provides practical application of classroom learning during placements within governmental agencies or the business community. A maximum of 6 credits of Internship may count toward graduation. Level: Undergraduate-Graduate

GPHY 499 - Senior Thesis. 3 Credits.
 (R-6) Offered autumn and spring. Prereq., WRIT 101 or equivalent, and one intermediate writing course and senior standing and consent of instructor. Independent research project in any geographical topic supervised by a faculty member, and leading to completion of the baccalaureate degree. Level: Undergraduate-Graduate

Gen Ed Attributes: Advanced Writing

GPHY 500 - Geography Graduate Colloquium. 1 Credit.
 (R-3) Offered autumn. Presentation of faculty and student research. Guest lecturers. Graded pass/not pass only. Enrollment required every autumn graduate students are in residence. Level: Graduate

GPHY 504 - Research Design in the Geographical Sciences I. 1 Credit.
 Offered once a year. To be taken during first semester of graduate studies and in sequence with GPHY 505. Understanding of diverse research approaches in the geographical sciences and development of thesis project. To be taken during first year of graduate studies. Level: Graduate

GPHY 505 - Research Design in Geographical Sciences II. 2 Credits.
 Offered once a year. Prereq., or coreq GPHY 504. Preparation of a thesis proposal: research design, data collection, analysis, interpretation, and presentation. Recommended to be taken during the first year of graduate studies. Level: Graduate

GPHY 520 - Seminar Geographical Thought. 3 Credits.
 Offered once a year. Geographical ideas, concepts, approaches, and techniques from ancient to modern times. Recommended to be taken during first year of graduate studies. Level: Graduate

GPHY 525 - Advanced Physical Geography. 3 Credits.
 (R-9) Offered intermittently. Advanced topics in climate and global change, paleo-environments and biogeography, landform analysis, soils, and other selected topics. Topic titles will appear in the Class Schedule. Level: Graduate

GPHY 550 - Seminar in Geography. 3 Credits.
 (R-9) Offered intermittently. Seminar topics in geography and society, human-environmental interaction, physical geography, regional geography, or geographical techniques. Level: Graduate

GPHY 560 - Seminar in Planning. 3 Credits.
 Offered spring odd-numbered years. A critical analysis of land planning history, theory, approaches, and practice. Emphasis is on the United States and England. Level: Graduate
GPHY 561 - Land Use Planning Law. 3 Credits.
Offered autumn. Same as ENST 561 and LAW 687. Basic overview of the law of land-use planning including, background in the traditional governmental regulatory, proprietary, and fiscal land use tools. Examination of modern techniques for land-use planning; consideration of constitutional limits of the authority of state and local governments. Focus on skills in interpreting, drafting, and applying state legislation and local ordinances. Level: Graduate

GPHY 562 - Land Use Planning Clinic. 1-6 Credits.
(R-6) Offered every term. Prereq. or coreq., GPHY 561. Same as ENST 562. Students assist local communities in long-range planning efforts and development of growth management plans as required by Montana law; ordinance drafting, development proposals, and land use issues. Level: Graduate

GPHY 564 - Planning Design. 3 Credits.
Offered spring even-numbered years. Prereq., graduate standing or Consent of Instructor. Analysis of land-use problems and design. Level: Graduate

GPHY 578 - Preceptorship in Geography. 1-3 Credits.
(R-6) Offered autumn and spring. Graduate standing and Consent of Instructor. Assisting a faculty member by tutoring, helping students with research projects, and carrying out other class-related activities. Level: Graduate

GPHY 580 - Seminar GIS & Cartography. 3 Credits.
(R-9) Offered every two years. Seminar topics in cartography and GIS. Applications to advanced studies in human and physical geography. Level: Graduate

GPHY 587 - Image Analysis & Modeling. 3 Credits.
Offered every two years. Prereq., GPHY 487 or FORS 351 or Consent of instructor; coreq., GPHY 589. Advanced topics in image analysis (e.g. hyperspectral images and pattern-recognition-based classification) and foundations of simple raster-based models. Level: Graduate

GPHY 588 - Spatial Analysis and Modeling. 3 Credits.
Offered autumn. Coreq., GPHY 589. Theoretical/conceptual and practical aspects of entity-based GIS modeling and spatial analysis. Point pattern analysis (i.e. cluster detection, density analysis, kriging), network analysis (i.e. network construction, network-based spatial statistics, accessibility modeling), and areal pattern analysis (i.e. spatial autocorrelative pattern, spatial regression modeling). Applications in urban and environmental planning, transportation, natural resource management, ecology, health, criminology, engineering, and business. Level: Graduate

GPHY 589 - Cartography/GIS Laboratory. 1 Credit.
(R-4) Offered autumn and spring. Laboratory to accompany GPHY 587 or 588. Level: Graduate

GPHY 595 - Special Topics. 1-8 Credits.
(R-9) Offered intermittently. Prereq., Consent of Instructor. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Level: Graduate

GPHY 596 - Independent Study. 1-9 Credits.
(R-9) Offered every term. Graduate standing and consent of instructor. Independent research in geography or planning. Level: Graduate

GPHY 597 - Professional Paper. 1-6 Credits.
(R-6) Offered autumn and spring. Graduate standing in Geography and Consent of Advisor. Level: Graduate

GPHY 598 - Internship. 1-9 Credits.
(R-9) Offered every term. Graduate standing and consent of instructor. Extended classroom experience which provides practical application of classroom learning during placements off campus. Level: Graduate

GPHY 599 - Thesis. 1-6 Credits.
Offered every term. Graduate standing in Geography and Consent of Advisor. Level: Graduate
